## LN52B550K1FXZA

Posted by FatPat - 2009/04/30 06:51

---

I was wondering if there was a calibration out for this tv. I am very unhappy with the picture on it. The colors all seem washed out, and are not bright at all. thanks for your help

Hi FatPat,

Where did you get the set? The model looks like it must be outside the US. We have a few B650 models. Try the LN40B650 settings at the link below and let us know what you think of the results.

It's a usa model just hot off the press. it was made march of this year less then 30 days old.

I will try them out and let you know thank very much
